CAREER OBJECTIVE

Motivated Computer Science and Engineering student seeking an entry-level Software Developer role. Skilled in Java, Python, and basic Artificial Intelligence and machine learning concepts, with hands-on experience in building real-world applications. Eager to contribute to innovate projects and grow in a dynamic organization.

EDUCATION

Bachelor of Engineering(CSE)

Vsm's Somashekhar R Kothiwale Institute of Technology, Nipani, Karnataka

CGPA-8.8

PUC

SDVS Sangh's Arts, Science and Commerce PU College , Sankeshwar

Year of Passing:2023

Science Stream - 85%

TECHNICAL SKILLS

Programming : Java and Python

Database Management : MYSQL

Web Technologies : HTML, CSS

Tools : Visual studio code, IntelliJ IDEA, Github,

AI Tools / Generative AI: Basic Knowledge of AI tools

PROJECTS

Guardian sense : AI Silent Emergency Detection

- Developed an AI powered mobile application that detects emergency situations without user interaction using sensor.
- Implemented anomaly detection on time-series data to identify abnormal behavior such as sudden falls or prolonged inactivity ,Integrated real-time alert mechanism to notify emergency contacts with location data .
- Focused on real-world applications such as women safety, accident detection and elderly care.

Hotel Reservation System (JDBC Based Project)

- Developed a Hotel Reservation System to manage room bookings , customer details, and reservation records. Implemented features such as room availability checking, booking management and customer information handling.
- Added features like reserve a room by providing guest details, room numbers and contact information ,view reservations made by customers including guest names, room numbers, and reservation dates and customizing it to edit , update and delete reservations .

Online Examination System

- Developed an Online Examination System to conduct and manage examinations digitally . Designed the system to handle student login ,question display , answer submission and result management .
- Improved understanding of system workflow , programming logic and user interaction , enhanced practical knowledge of software development concepts and structured data handling .
- The platform provides a secure and user friendly environments for Admins and Students to manage and take online tests effectively.

CERTIFICATIONS

1. Programming in Java - NPTEL .
2. AI for Beginners - HP life foundation .
3. Introduction to Generative AI tools - Simplilearn .

ACHIEVEMENTS

- Completed Deloitte's Cyber Job Simulation and gained exposure to covering threat analysis and security awareness.
- Participated in Technical Quiz Competition and qualified for final round.
